

## Executive Profile

***Sundaresan Subramanian (“Subi”)***  
***Founder President, ConsultSubi, IL, USA***

Sundaresan Subramanian (“Subi”) is an accomplished senior energy and environmental management professional with an impressive array of international experiences in multinational corporations and U.S. government agencies. With a unique combination of technical, marketing and managerial talents, Subi has a strong background in the development and building of US-Asia partnerships and facilitating implementation of green projects.

Subi served as a distinguished Director of US-Asia Environmental Partnership (US-AEP) program at the American Consulate in Chennai/India and later as the Program Director at the Council of State Governments (CSG), KY, USA managing a \$5.4 million matching grants program of USAID linking US and Asia on energy and environmental projects. He had successfully promoted dozens of US-Asia green projects and business partnerships. Leveraging U.S. expertise, and funding from several independent agencies, he helped address many critical energy and water related issues in India and other developing countries in Asia. Subi’s earlier corporate experience includes working for multinational corporations; as the Managing Director of the first Indo-American energy management consulting company (ANCO-Arjay) and as the Chief Executive of the first Indo-US Energy Services (ESCO) company (INTESCO-Bhoruka); General Manager in Raunaq Group and electrical giant Crompton Greaves Ltd. He has carried out numerous consultancy assignments, energy audits, implemented energy efficiency projects and trained thousands of workers in energy management, renewable energy, marketing, productivity and quality improvement.

Subi’s impressive work is recognized through many international awards including the U.S. Department of State’s “*Meritorious Honor Award*,” the U.S. Association of Energy Engineers’ “*Energy Professional Development Award*,” and “*Regional Environmental Award*,” the Government of Tamil Nadu’s “*Environmental Expert Award*,” and “*Award of Appreciation*” from the Indian Association of Energy Management Professionals.

Backed by brilliant academic qualifications and advanced training in many countries including Japan, USA, the Philippines and Vietnam, Subi is a LEED Green Associate of the U.S. Green Business Council. He is a graduate in electrical engineering from the University of Poona, and a graduate in production engineering (UK). He also holds post-graduate qualifications in Business Management from St. Xavier’s Institute of Management, Mumbai/India.
