

ConsultSubi
Building Partnerships

Executive Profile

Sundaresan Subramanian (“Subi”)

President and CEO, ConsultSubi, Chicago, IL, USA

Sundaresan Subramanian (“Subi”) is an accomplished senior management professional with an impressive array of international work experiences in corporations and U.S. government agencies. With a unique combination of technical, marketing and managerial skills, Subi has a strong background in business development, project financing and building of international partnerships in the field of energy, engineering and environment. He is the founder of ConsultSubi, a consulting company, based in Chicago, USA.

During his distinguished career, Subi held senior management positions in multinational corporations including Crompton Greaves Ltd., (an electrical conglomerate), Indo-American Energy Consulting and Service companies and U.S. Government agencies. As the Asia Program Director at the U.S. Council of State Governments (CSG), he implemented a multimillion dollar grants program of USAID linking US and six Asian countries through 30 projects in the energy and environmental sectors. Earlier, based in the American Consulate General in Chennai, as Regional Director of US-Asia Environmental Partnership (US-AEP) program of USAID, he had successfully promoted dozens of US-Asia green projects and business partnerships to address many critical energy and environment related issues in India. His accomplishments include promotion of energy efficiency and environmental projects in industry/commercial complexes and building a powerful workforce of energy professionals through innovative training of workers.

Subi’s work is recognized through many international awards such as the U.S. Department of State’s “*Meritorious Honor Award*,” the U.S. Association of Energy Engineers’ “*Energy Professional Development Award*,” and “*Regional Environmental Award*,” the Government of Tamil Nadu’s “*Environmental Expert Award*,” “*Award of Appreciation*” from the Indian Association of Energy Management Professionals, an exceptional award of professional recognition from the City and Province of Iloilo, Philippines.

His work experience is backed by brilliant academic qualifications and advanced technical and management training in many countries including Japan, USA, the Philippines and Vietnam. Subi serves as a LEED Green Associate of the U.S. Green Business Council. He holds degrees in electrical engineering from the University of Poona, production engineering (UK), a PG diploma in Business Management from St. Xavier’s Institute, Bombay and a honorary doctorate from a U.S. University. He serves as an international consultant, a visiting faculty to institutions and in his spare time teaches Sanskrit and Scriptures to students around the globe.
